

AB1953 / Vermont Act 193 UPDATE

February 18, 2010

Dear Valued Blanco Customer:

BLANCO is continuing to work diligently with both IAPMO and NSF to complete all listing certifications in order to meet the new statutes.

We are still awaiting regulatory approval on several models which have pushed our expected compliance date into 2010. Although disappointed, we are extremely confident that we can complete the listing certifications in the next several weeks since all testing is nearly complete by third party agencies. A full listing of all faucet skus and their status is attached. We have also posted this on the home page of our website www.blancoamerica.com for your convenience. We will continue to update you on any status changes in both e-mail and website updates as they occur.

We have also changed the report content regarding approvals and stock status of AB1953 compliant faucets in order better serve you.

Please also note that we have update this list to include our 2010 new faucets being launched in May and faucets which we will discontinue as part of this new product launch. A separate correspondence outline all of these product changes will be available in the next few days.

BLANCO will not accept orders from any customers in affected states for products that are not properly listed with IAPMO or NSF regardless of the requested ship date. The new format will make it clear as to which products are approved and what is the estimated time of in stock product.

We sincerely apologize for this delay and any difficulties that it may cause you or your customers.

Again, we will continue to update you and our website homepage on our progress regarding compliance as soon as it happens. As always, we thank you for your continued support of the BLANCO brand, and we look forward to continued partnership in the future.

Best Regards,

A handwritten signature in black ink, appearing to read "Tim Maicher".

Tim Maicher
Director of Marketing
Blanco
